

# About Specialty Pharmacies

**RELYVRIO™ (sodium phenylbutyrate and taurursodiol) is a medication that is only available through select specialty pharmacies.**

## **What are specialty pharmacies?**

- These facilities are different from retail pharmacies. They have specialty pharmacists who are experts in medications that treat rare and complex diseases that may require special handling or personalized support. They will reach out to coordinate your first shipment of RELYVRIO, assist you with your ongoing refill needs, and collaborate with your doctor, who is always the best source of treatment information. The medications they dispense will be shipped directly to your home

## **How does my prescription get to a specialty pharmacy?**

- Your specialty pharmacy will receive your RELYVRIO prescription from the Amylyx Care Team (ACT)™ after a benefit investigation has been completed. The specialty pharmacy will then contact you upon insurance approval to coordinate delivery of RELYVRIO

## **How do I get my medication from a specialty pharmacy?**

- ACT will partner with your specialty pharmacy to coordinate delivery of RELYVRIO so that it is sent directly to you

## **What if I have questions about my medication?**

- Specialty pharmacists are important members of your care team with comprehensive knowledge about RELYVRIO who can answer many questions you have about your medication

## **Who can help me learn more about specialty pharmacies?**

- Your ACT Care Coordinator can help you learn more about your specialty pharmacy options. You can also learn more at [AmylyxCareTeam.com](https://www.amylyxcareteam.com) or by calling ACT at **866-318-2989**
